

KOBEI, LOW

Storage that's unexpected. Storage that's surprising. Storage that's unique.

This very old, yet rarely used European cabinet making technique, is based around the simplest of ideas. An integrated central running system which provides lateral guidance when operating the drawer. This clever concept allows the drawer to be totally visible when being opened and closed. Together with the open storage shelf, the framework consequently becomes a visual highlight in itself. This provides intrigue and lightness to the overall form. This smaller size unit is perfect as a bedside or side table as required.

Dimensions (mm)

550 wide x 450 deep x 530 high

Materials

Wood,

(F)ramework + (D)rawer Options:
