

ESCHER MIRROR

The Escher mirror is simultaneously concerned with numerous mathematical and visual concepts, including: reflection, perspective, infinity, asymmetry and geometry as well as impossible visual objects. A minimalist and contemporary wall mirror is elevated to the status of “visual art” by the addition of a solitary coloured line which flows around the mirror frame on either an internal or external facet. The external line detail adds visual interest when one examines the mirror by walking up to it and staring, whilst the internal line adds an element of intrigue as its reflection can also simultaneously be seen. The mirror can be mounted in either a horizontal or vertical fashion as your space allows.

Dimensions (mm)

350 wide x 400 high x 130 deep

Materials

Mirror, Wood, MDF backing board (unseen)
Wood Options: Frame: Mountain Ash, Silver Wattle
Line Detail: Mountain Ash Dowel (painted black)

Finish

Clear, matte finish, water based on wooden components
