

## ALTO, ARMCHAIRS + SOFAS

We are all different, we like different things and being comfortable means different things to each of us. That's why we've created a lounge series that allows each sitter to determine just how far back they want to sit and how much back support they want at any time, without having a bunch of separate scatter cushions strewn all over the place. This unique concept allows a perfectly sized back cushion to be either used and sit normally on top of the seat, or simply flipped over the tapered backrest when not wanted. But it will never leave the armchair because it is attached to the frame with a pair of custom made leather straps. So use the cushion or flip it over and get it out of the way whenever you want. The choice is yours but rest assured it will always be there waiting for you when you want it.
