

## CASE STUDY® FIBERGLASS SIDE + ARM SHELL EIFFEL CHAIR

The true iconic original classic from Modernica. - the Case Study® Fiberglass Side + Arm Shell Eiffel Chair. The shell chairs were first available in the spring of 1950 and were manufactured and distributed until 1983. In 2000, Modernica revived this potentially lost art of high-pressure, molded fiberglass. Modernica creates each shell, by hand, one-by-one, in their Los Angeles factory-just as they had been designed, developed, and produced in Southern California in the 1950s. Modernica uses all of the original presses and specialized equipment obtained by the original manufacturing plant. To ensure authenticity of production, the initial shell production was overseen by the very same team employed over sixty years ago to develop the original technology. Handcrafted in Los Angeles, U.S.A.

### Dimensions (mm)

Side Shell  
470 wide x 547 deep x 789 high  
Seat: 433 high

Arm Shell  
636 wide x 598 deep x 814 high  
Seat: 395 high

### Materials

Shell: Fiberglass – PBDE free (Polybrominated Diphenyl Ethers) + Fire safety approved.  
Legs: Zinc plated steel or Black powder coat

### Colours

Shell: Natural, White, Oatmeal, Terracotta, Chiffon, Black  
Legs: Zinc plated steel, black powder coat

### Design

Charles + Ray Eames  
Made in Los Angeles, USA
