

## CASE STUDY® FIBERGLASS SIDE + ARM SHELL ROCKING CHAIR

The true iconic original classic from Modernica. - the Case Study® Fiberglass Side + Arm Shell Rocking Chair. The shell chairs were first available in spring 1950 and were manufactured and distributed until 1983. In 2000, Modernica revived this potentially lost art of high-pressure, molded fiberglass. Modernica creates each shell, by hand, one-by-one, in their Los Angeles factory-just as they had been designed, developed, and produced in Southern California in the 1950s. Modernica uses all of the original presses and specialized equipment obtained by the original manufacturing plant. To ensure authenticity of production, the initial shell production was overseen by the very same team employed over sixty years ago to develop the original technology. Handcrafted in Los Angeles, U.S.A.

---

### Dimensions (mm)

Side Shell  
458 wide x 687 deep x 764 high  
Seat: 420 high

Arm Shell  
636 wide x 694 deep x 687 high  
Seat: 369 high

### Materials

Shell: Fiberglass – PBDE free (Polybrominated Diphenyl Ethers) + Fire safety approved.  
Legs: Zinc plated steel or Black powder coat  
Timber Rails: Maple or Walnut

### Colours

Shell: Natural, White, Oatmeal, Terracotta, Chiffon, Black  
Legs: Zinc plated steel, black powder coat  
Rails: Maple (blonde) or Walnut (dark)

### Design

Charles + Ray Eames  
Made in Los Angeles, USA
